

Elevator Car Top Maintenance Station

GMS375

TOTALLY CUSTOMIZABLE

Our strength is working together with the customer to create the best solution for its specific needs, creating a truly tailor-made product that qualitatively and functionally meets code and our partner requirements.

LIGHTING IMPROVEMENT

The **GMS375** incorporates two bright LED strip lights molded into the top of the inspection box.

This allows for additional focused yet flexible lighting on the car top in case of weak lighting conditions.

GIOVENZANA
INTERNATIONAL B.V.

INTEGRATED SOCKET

The **GMS375** also incorporates a UK RCD socket. Major international sockets can be fitted on request to adapt the inspection box to the global market.

Elevator Car Top Maintenance Station

GMS375
